

# **Task 1**

For this task, I created a Digital Literacy Awareness infographic using Canva, as it is simple to use and provides many ready-made templates. My design focuses on three important topics: what digital literacy means, safe internet practices, and email etiquette. In the infographic, I explained digital literacy as the ability to use digital tools and the internet effectively and responsibly. I also included basic safety tips like using strong passwords, avoiding unknown links, and protecting personal information online. Additionally, I highlighted the importance of email etiquette, such as writing clear subject lines, using formal language, and maintaining a respectful tone while communicating.

While designing the infographic, I tried to keep the content simple and visually appealing so that it is easy for students to understand quickly. One interesting part of this task was learning how to present information in a concise and creative way instead of writing long paragraphs. However, I found it slightly challenging to choose the right layout and balance between text and visuals. Overall, this task helped me understand the importance of digital literacy and how to communicate it effectively.
