

Task5

For this task, I explored the topic of cybercrime, focusing on UPI fraud, which is becoming very common in India. While researching, I was surprised to see how easily scammers can trick people by using simple methods like fake calls or payment requests. Many people are not aware that entering a UPI PIN is only required for sending money, not receiving it, which makes them vulnerable to such scams.

This task helped me understand how these frauds actually happen step by step and how important it is to stay alert while using digital payment apps. I also learned about the importance of reporting cybercrime through official platforms like the National Cyber Crime Portal and helpline number 1930.

One habit I will personally change is that I will always double-check any payment request before approving it and never trust unknown calls asking for financial details. Overall, this task increased my awareness about online safety and made me more careful while using digital platforms.
